

Voice and Video Interviewing

for a Seamless, Complete Candidate Evaluation

Traditional hiring takes 45 days on average and costs \$1,500 – \$5,000 per hire.

With PeoplogicaSkills voice & video, interviews are productive, convenient and economical.

Why PeoplogicaSkills Voice & Video?

With this new feature, you can add video questions to your skills tests, which reduces the need to rely on résumés and helps you make better decisions with structured, standardised interviews.

Unified Solution

Combine video & video interview questions with other skills tests, behavioral assessments and simulations.

Flexibility and Customisation

Vary the number and level of difficulty for questions and set a time limit.

Excellent Customer Service

Receive 24/7 live support for hiring teams and candidates.

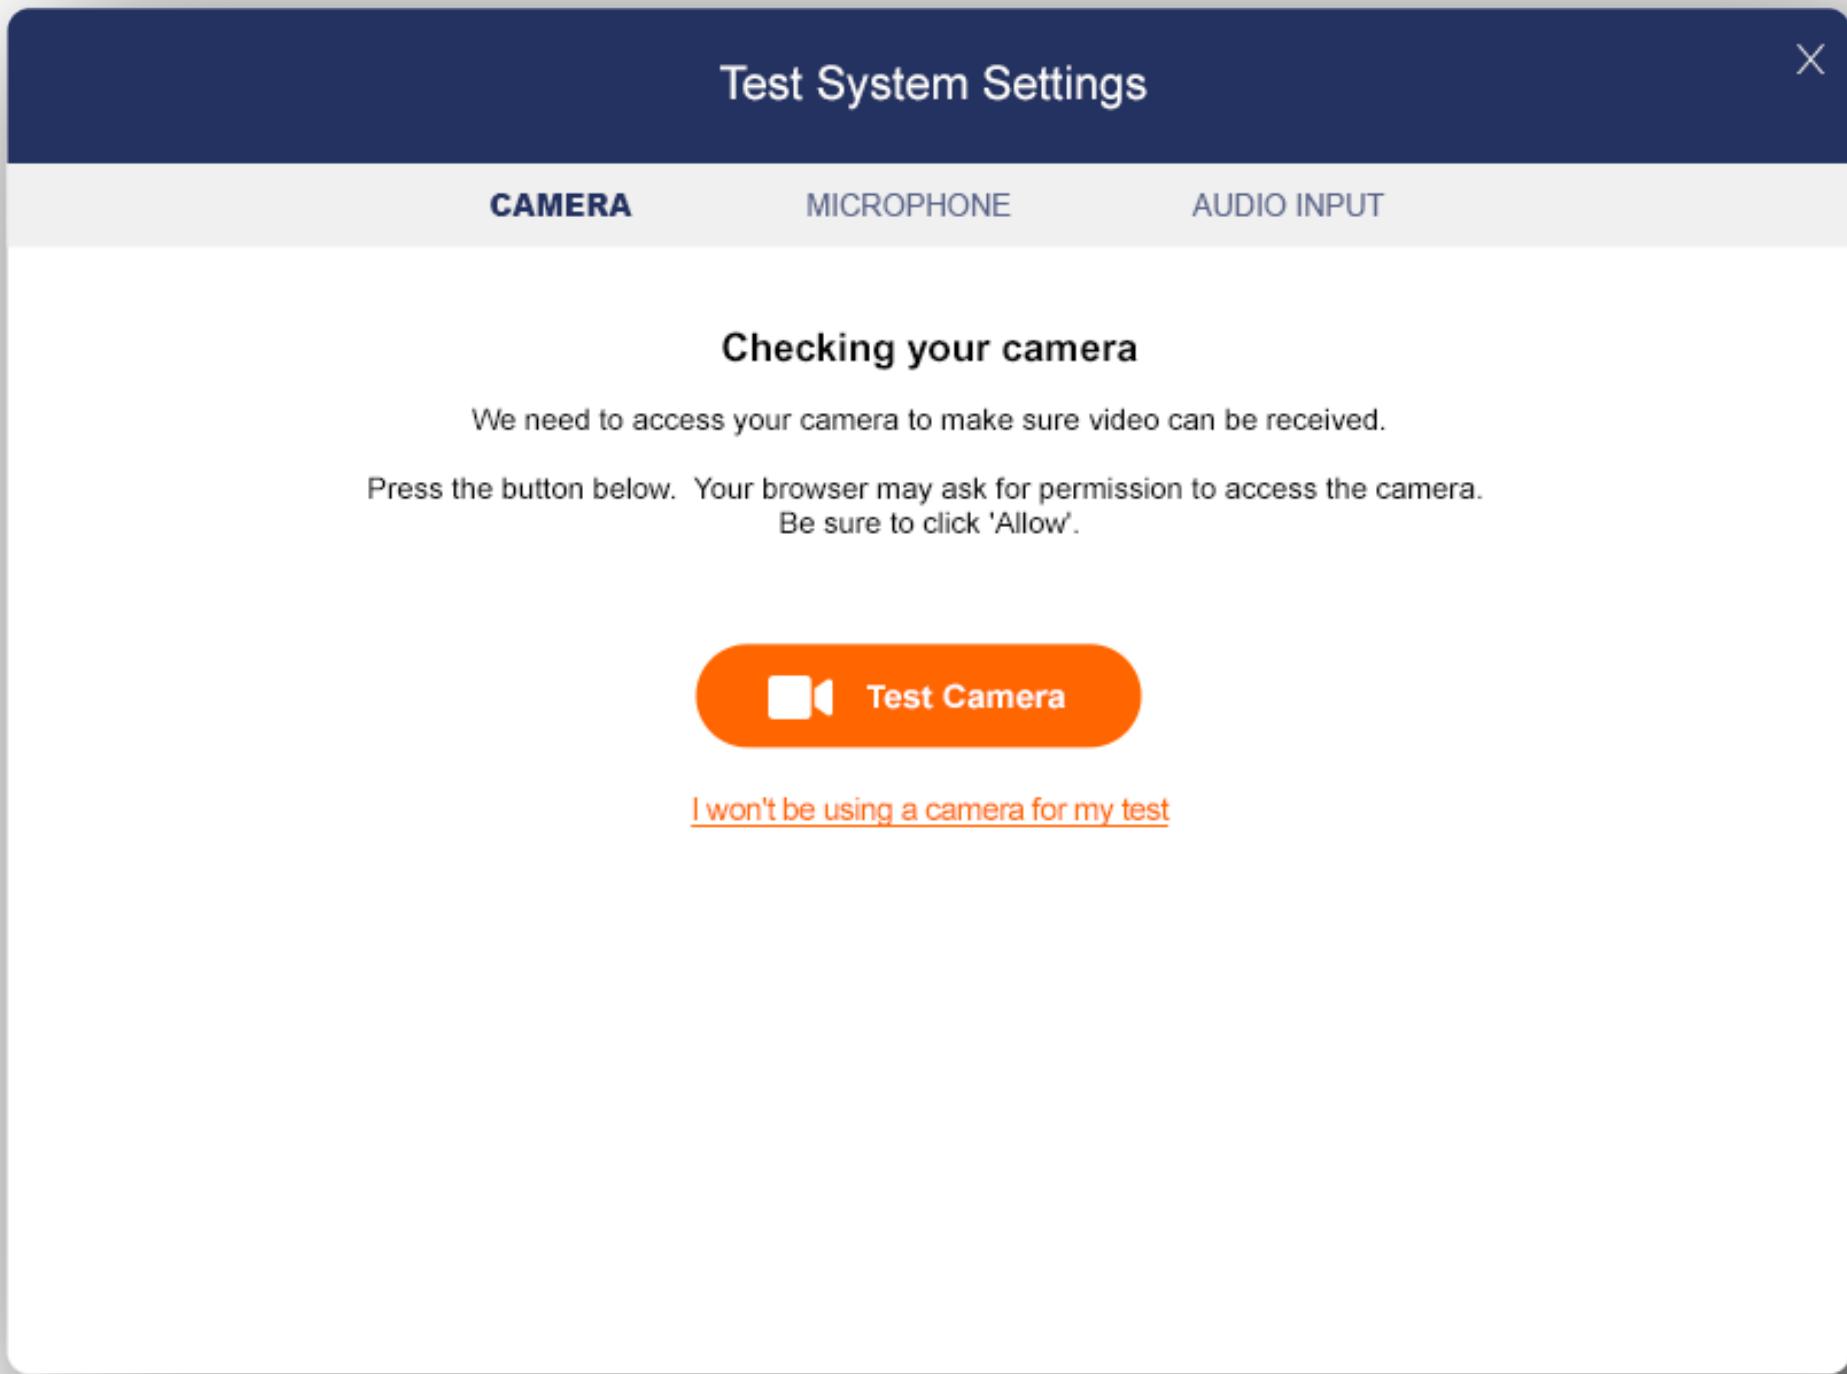

Friendly Experience

Test-takers don't have to install Java or other plug-ins.

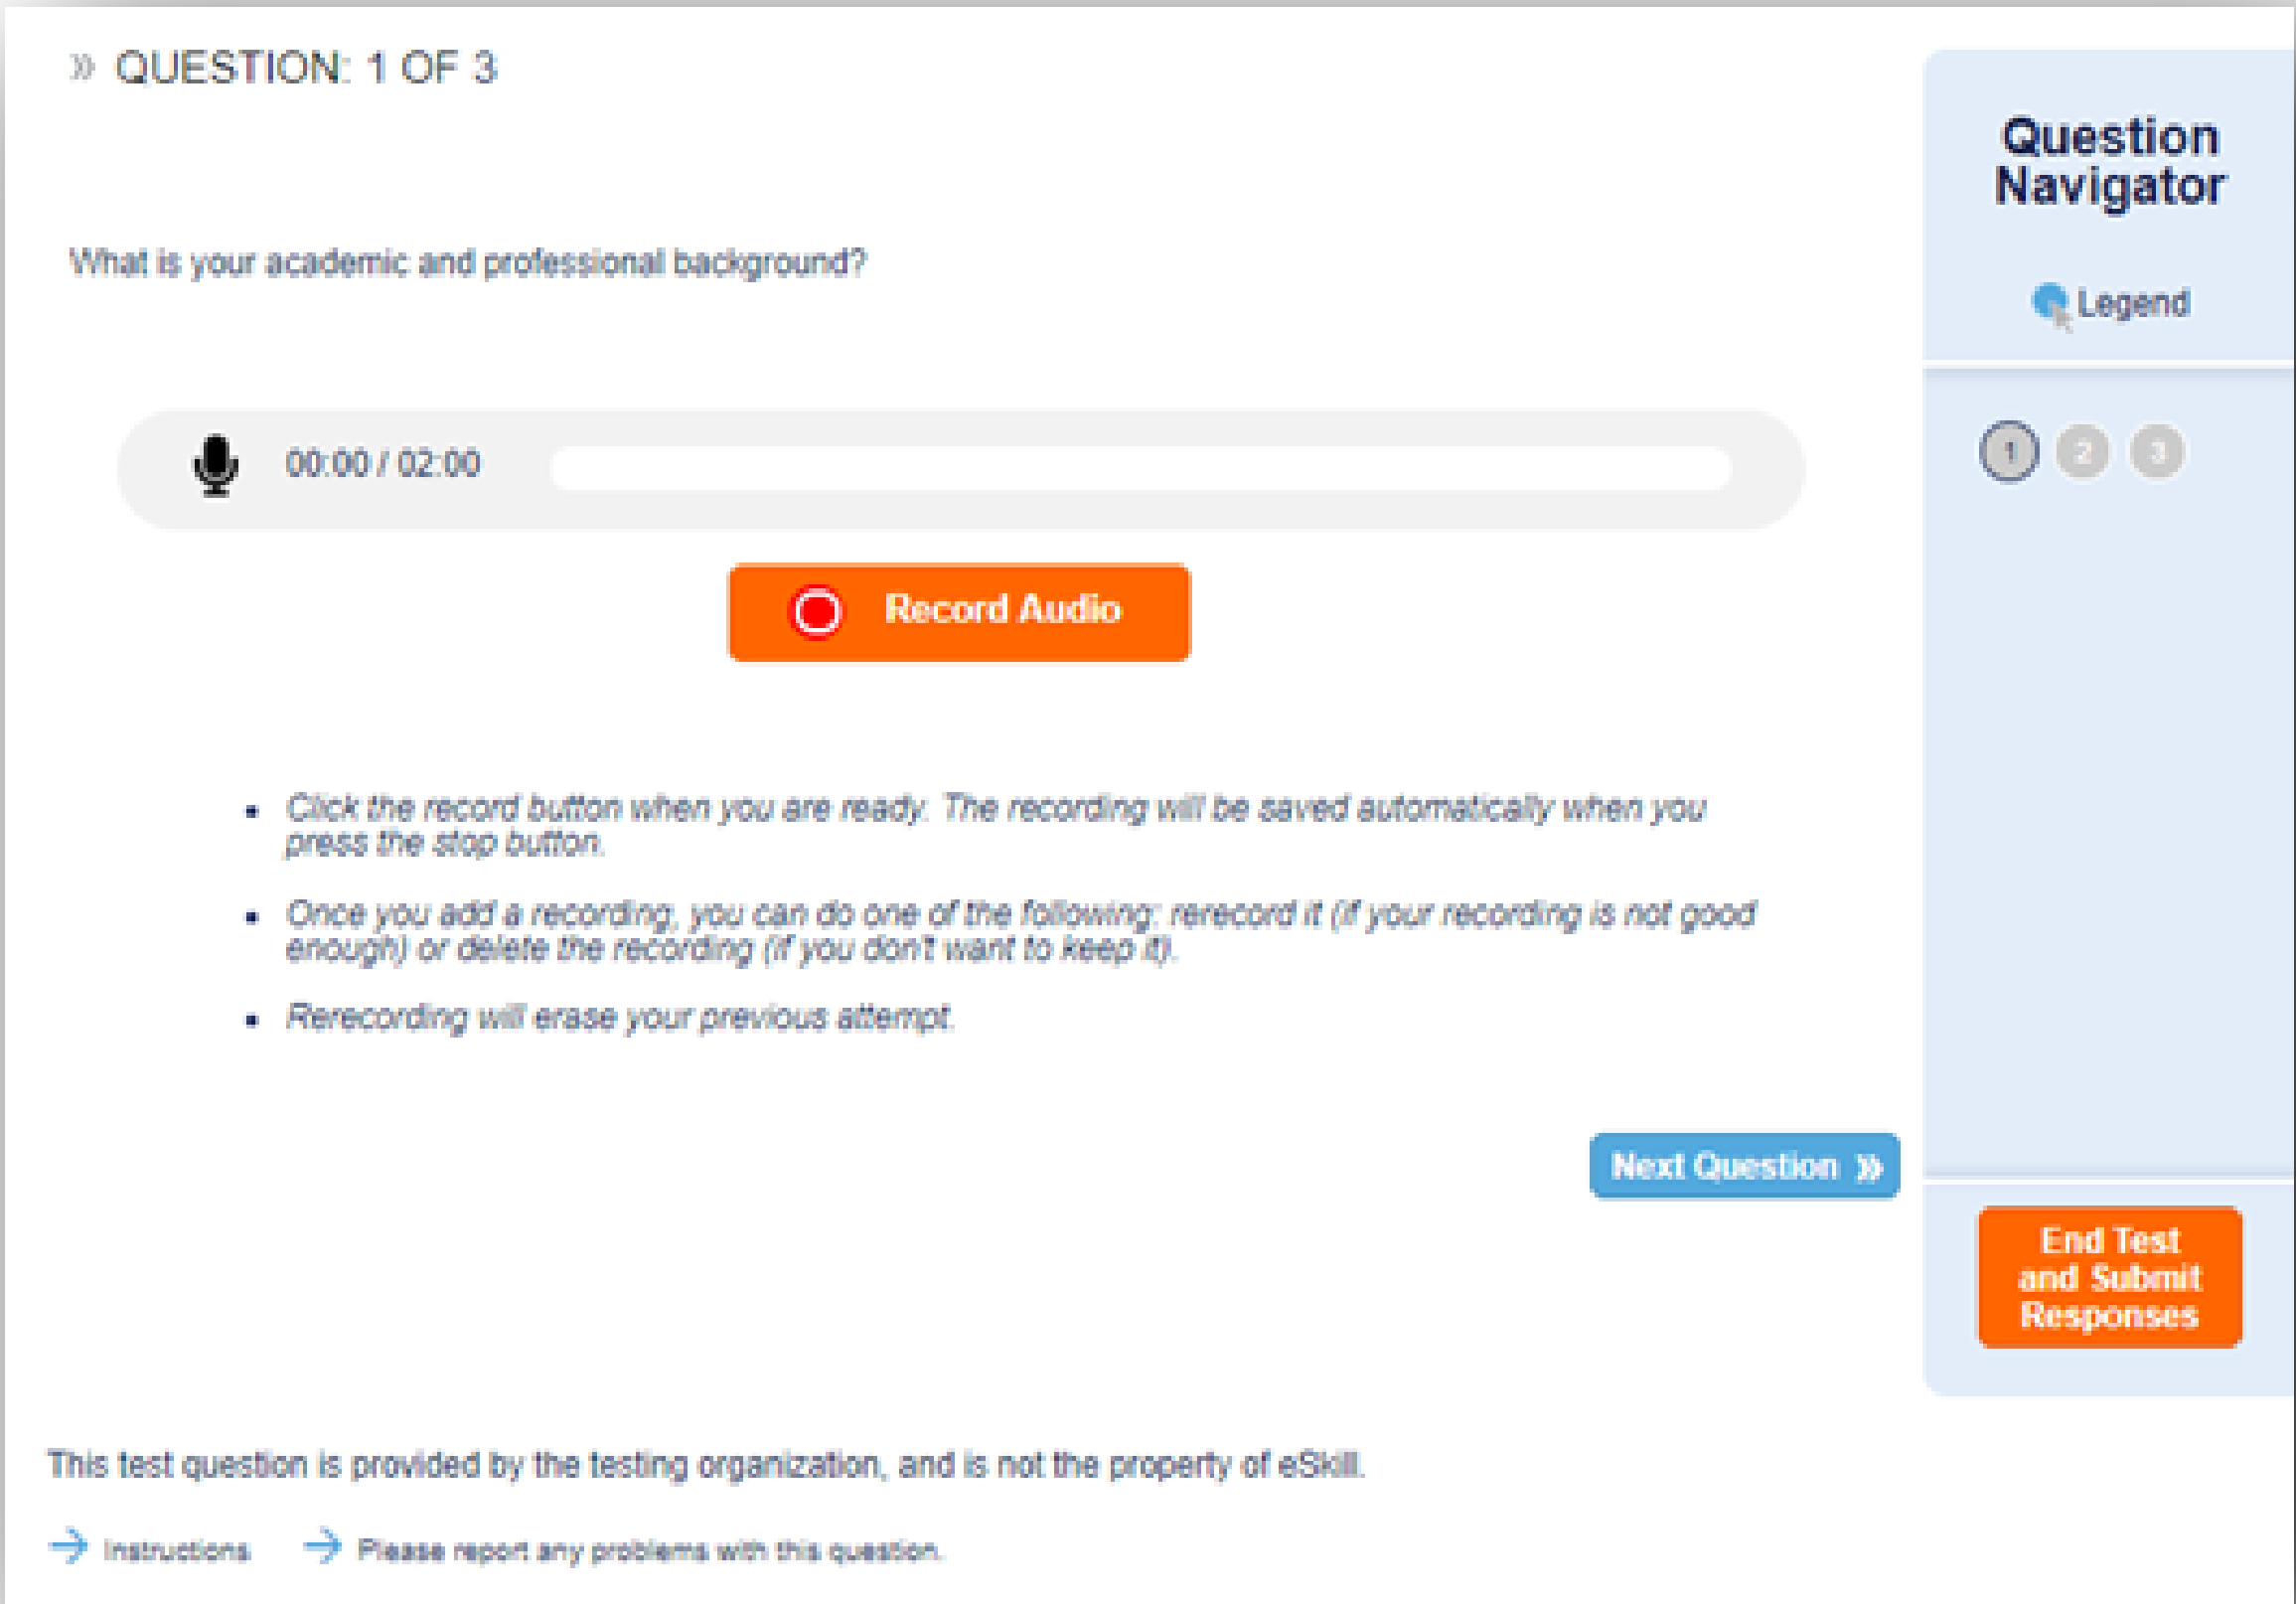

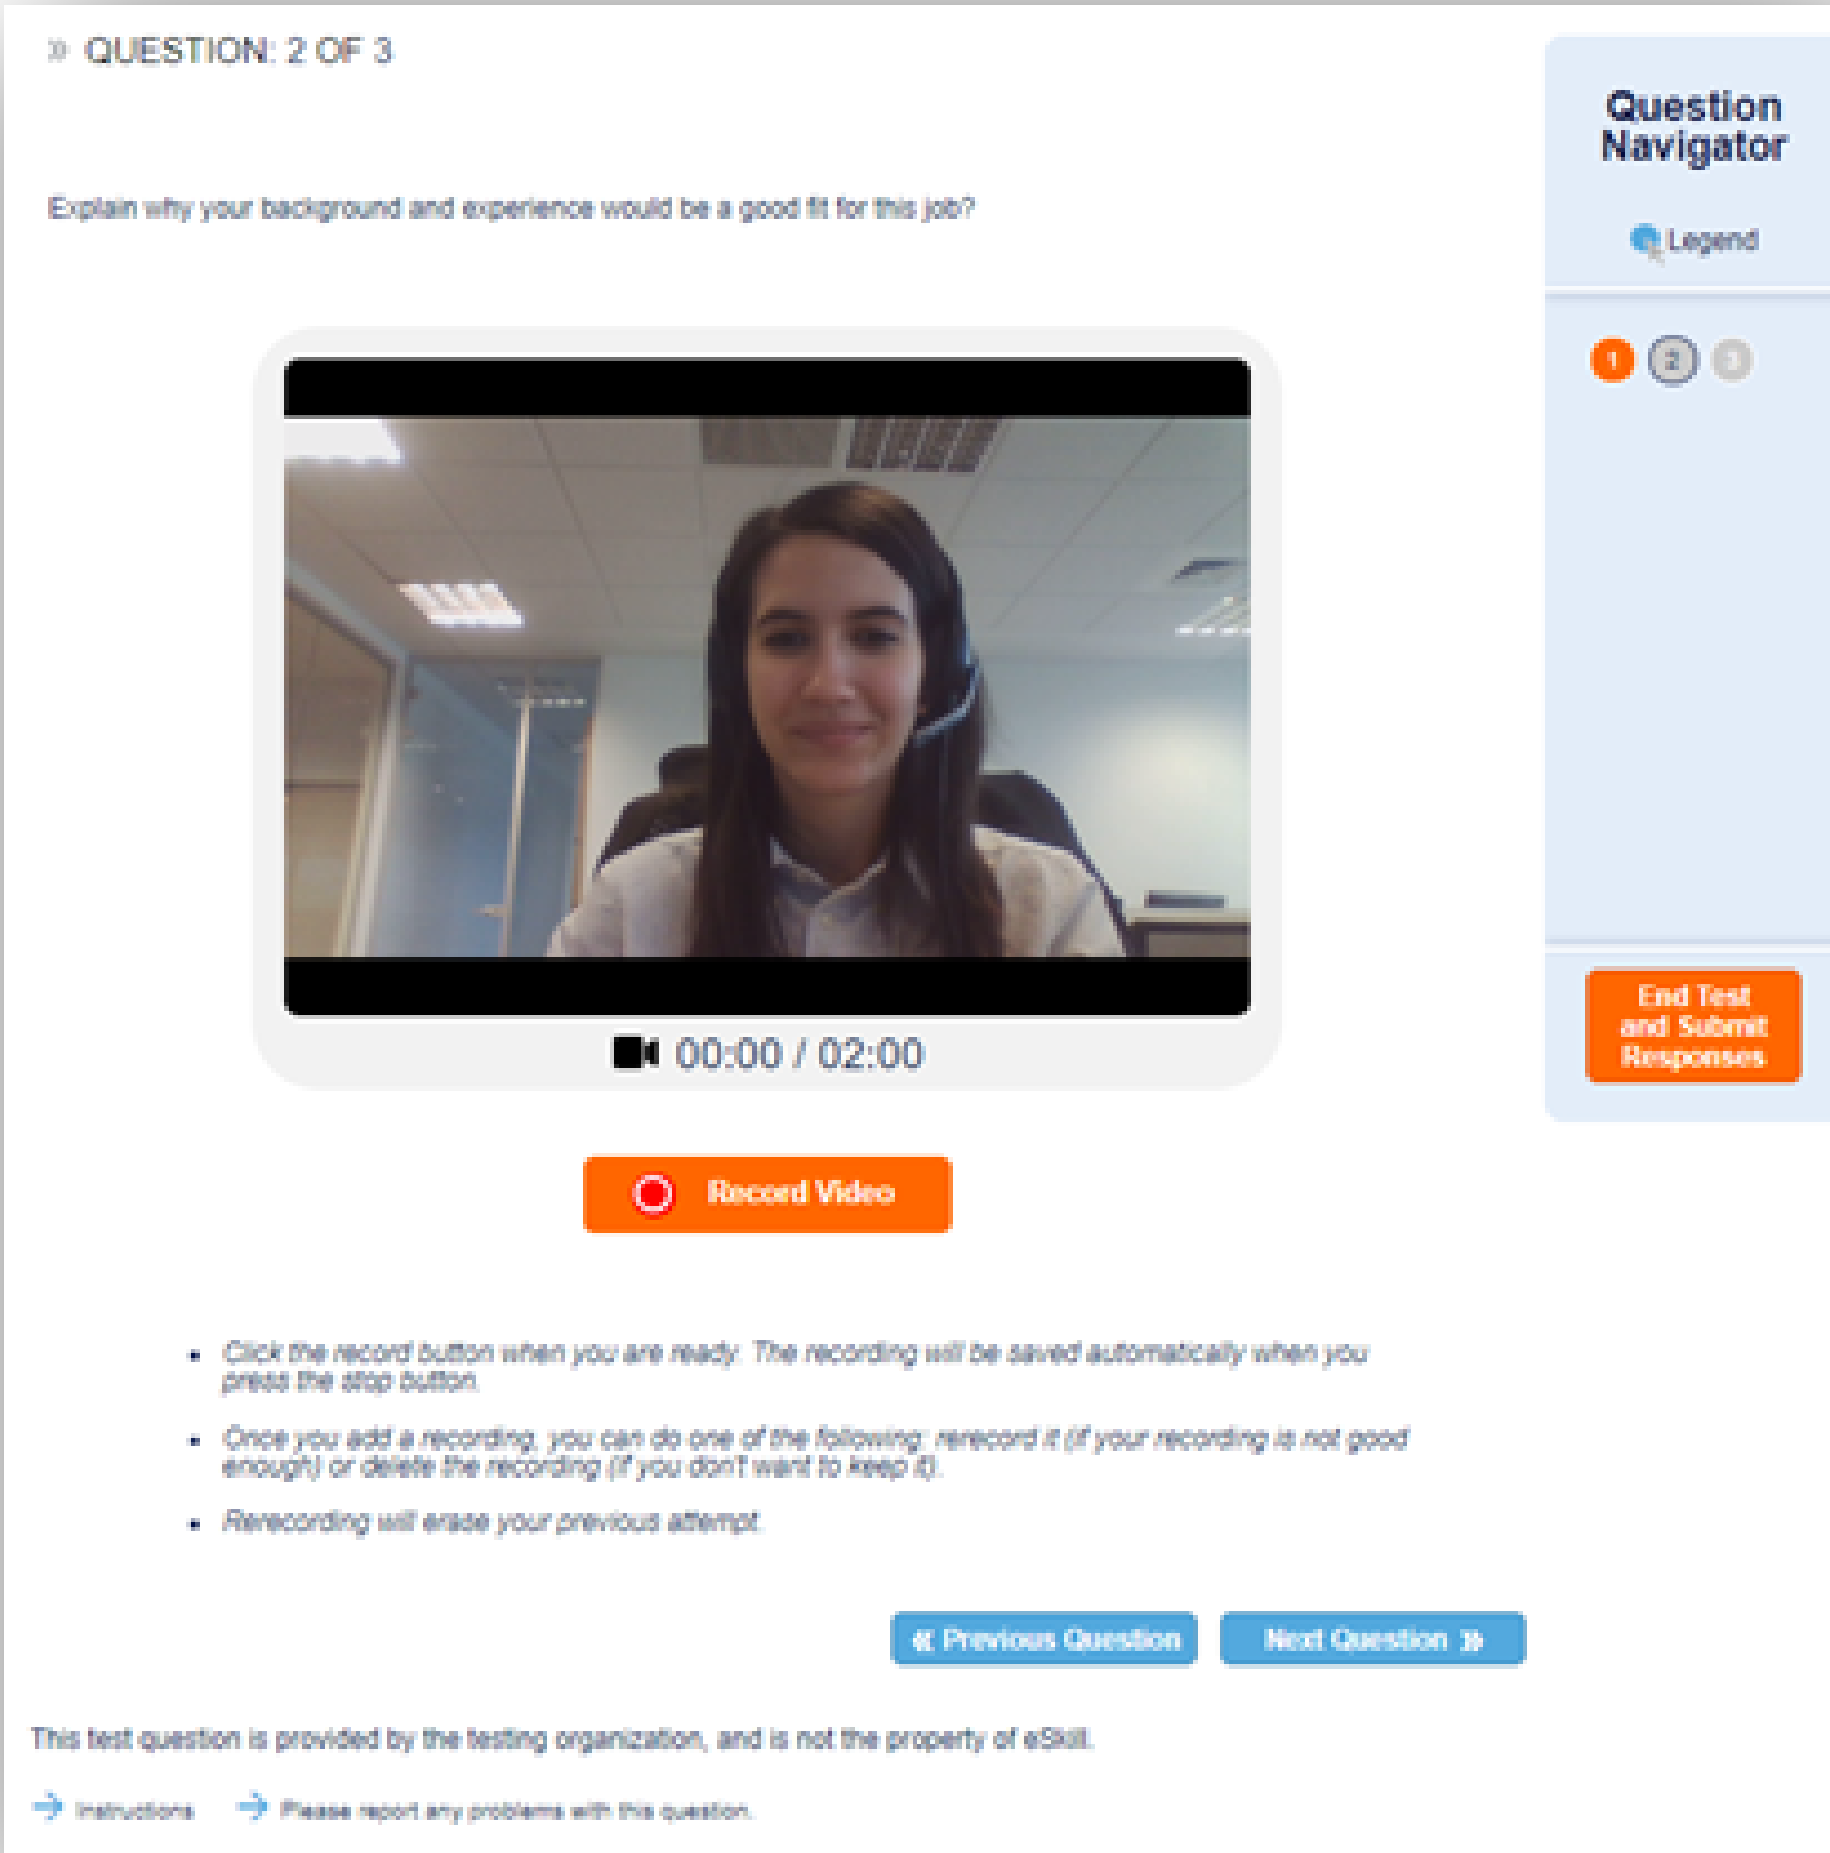

Assess and Interview Candidates in One Unified Step

A unified recruiting strategy can shorten the time-to-hire by 60% and cut recruitment expenses by 30%.

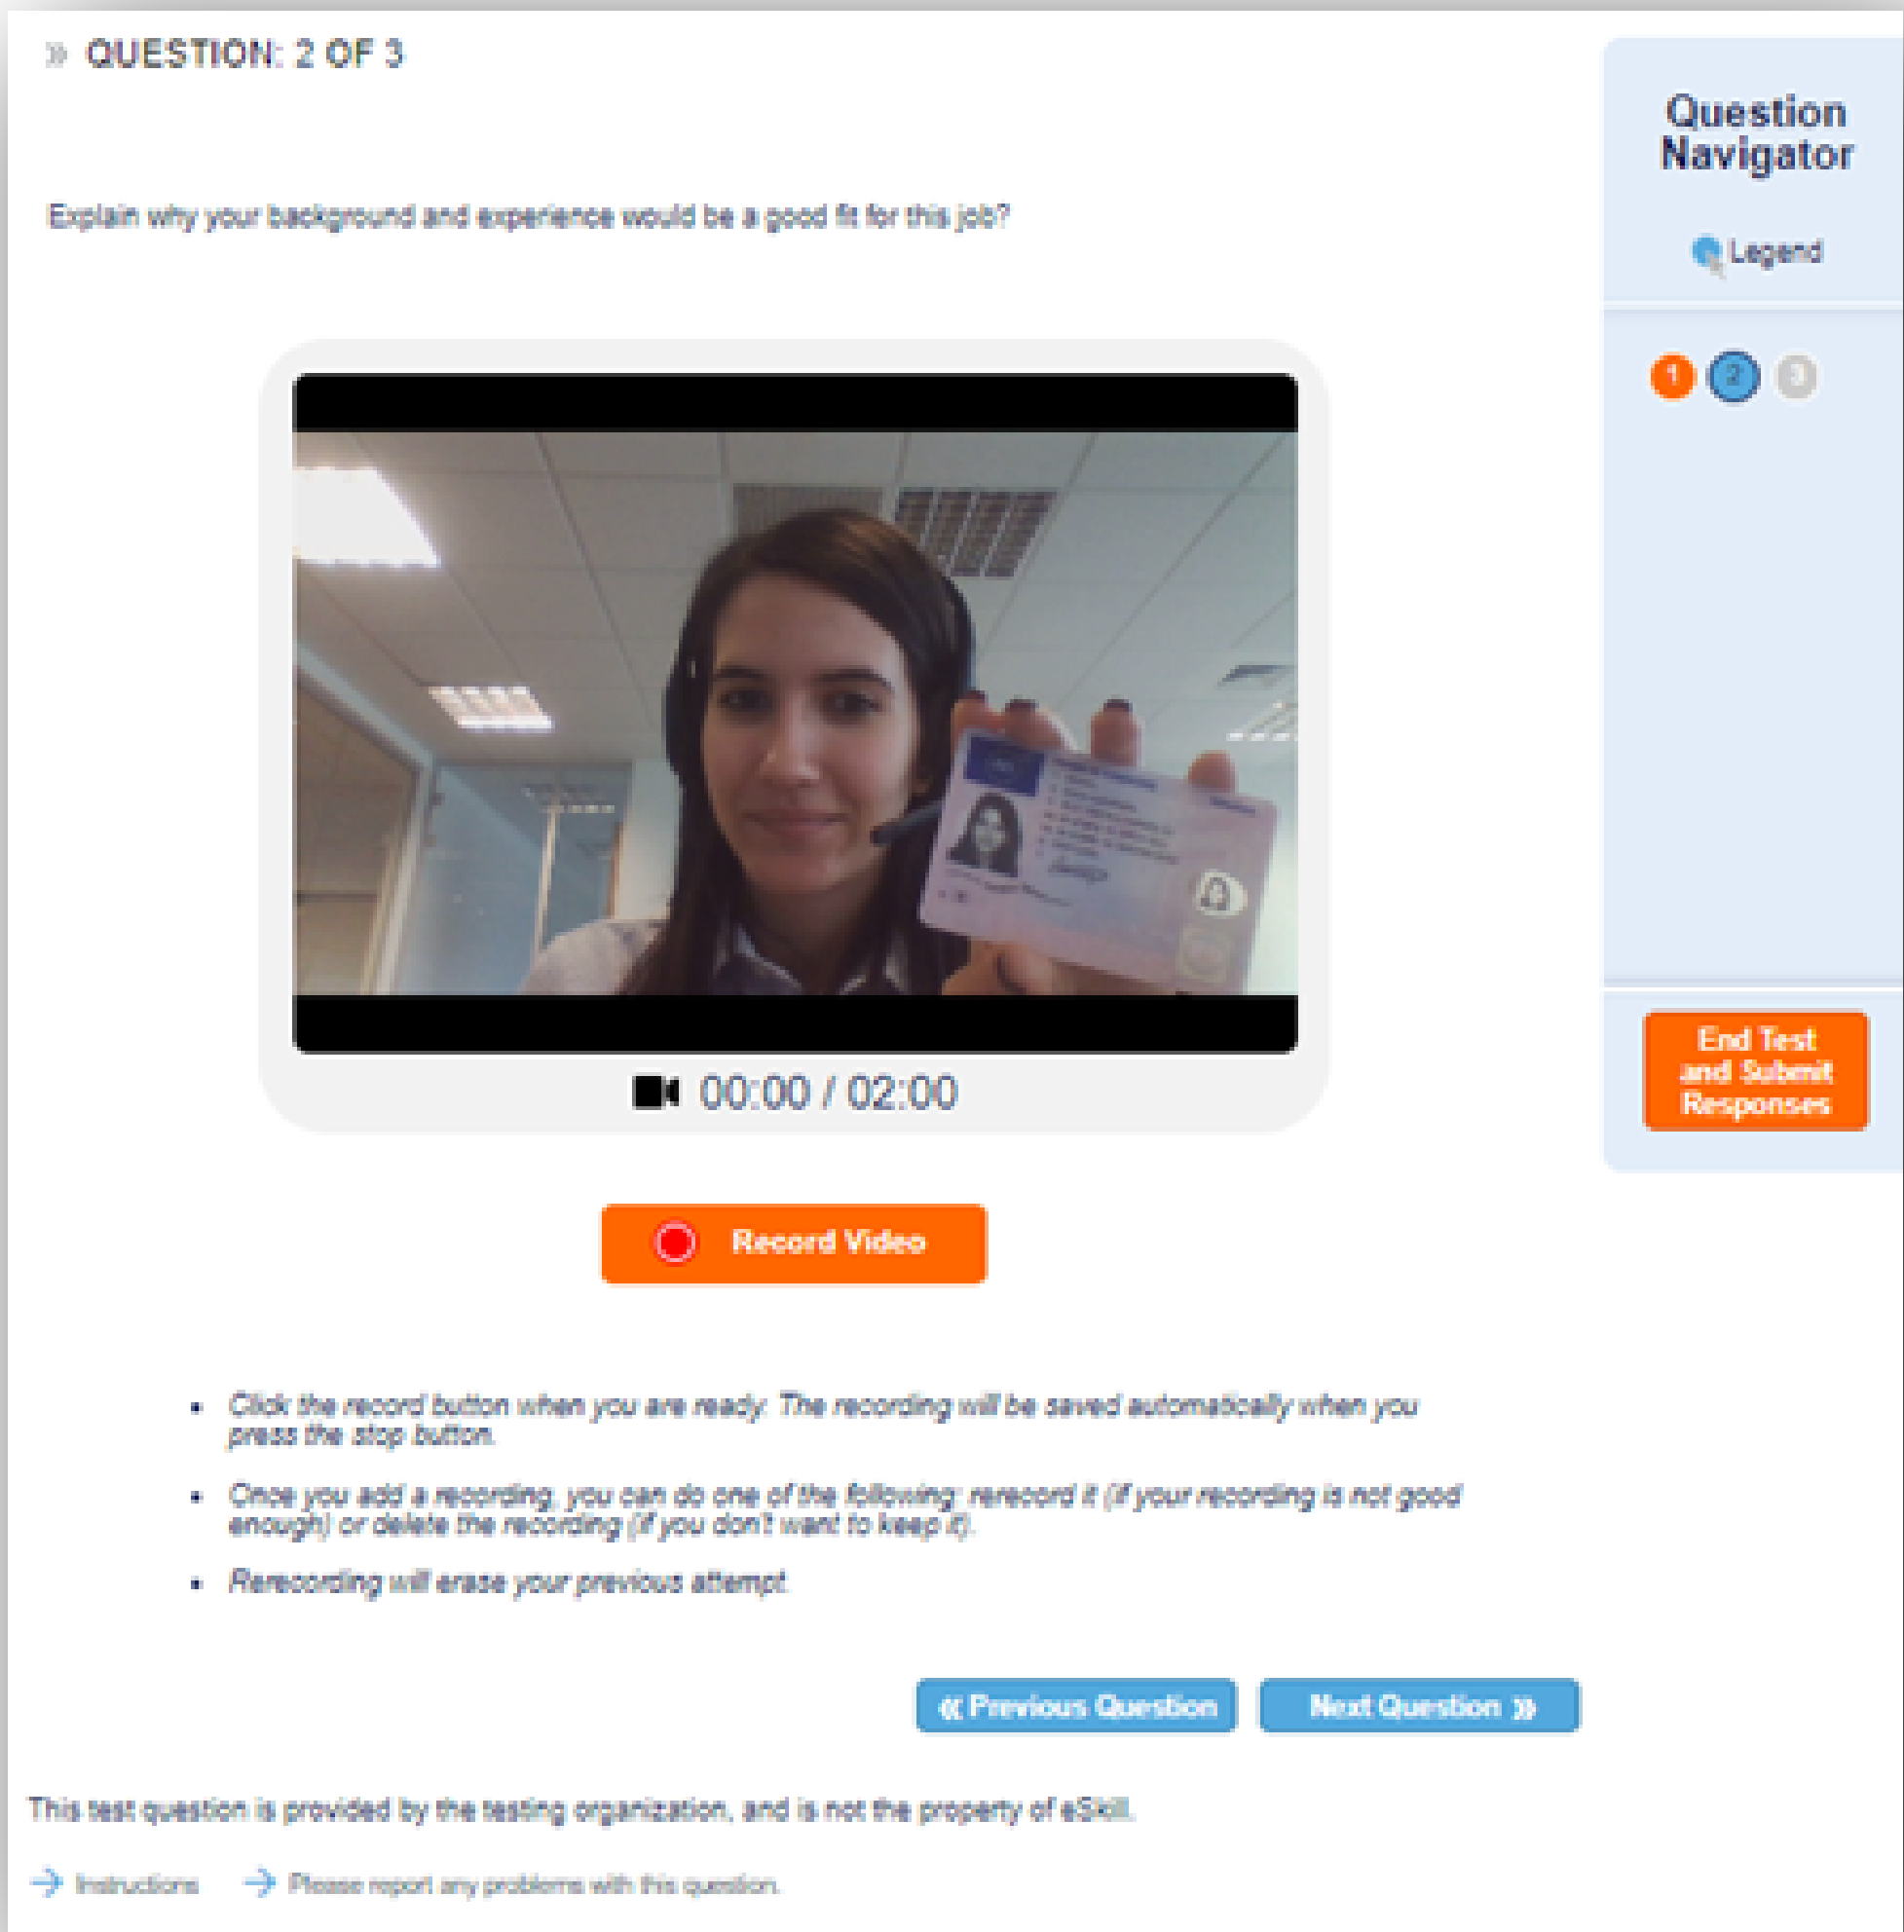

1. The system will check for camera and microphone capability and confirm the candidate is able to record their responses, before beginning their test.

2. A scenario is presented to the candidate. They can record their response by either reading the scenario, answering the scenario, or responding in a different language.

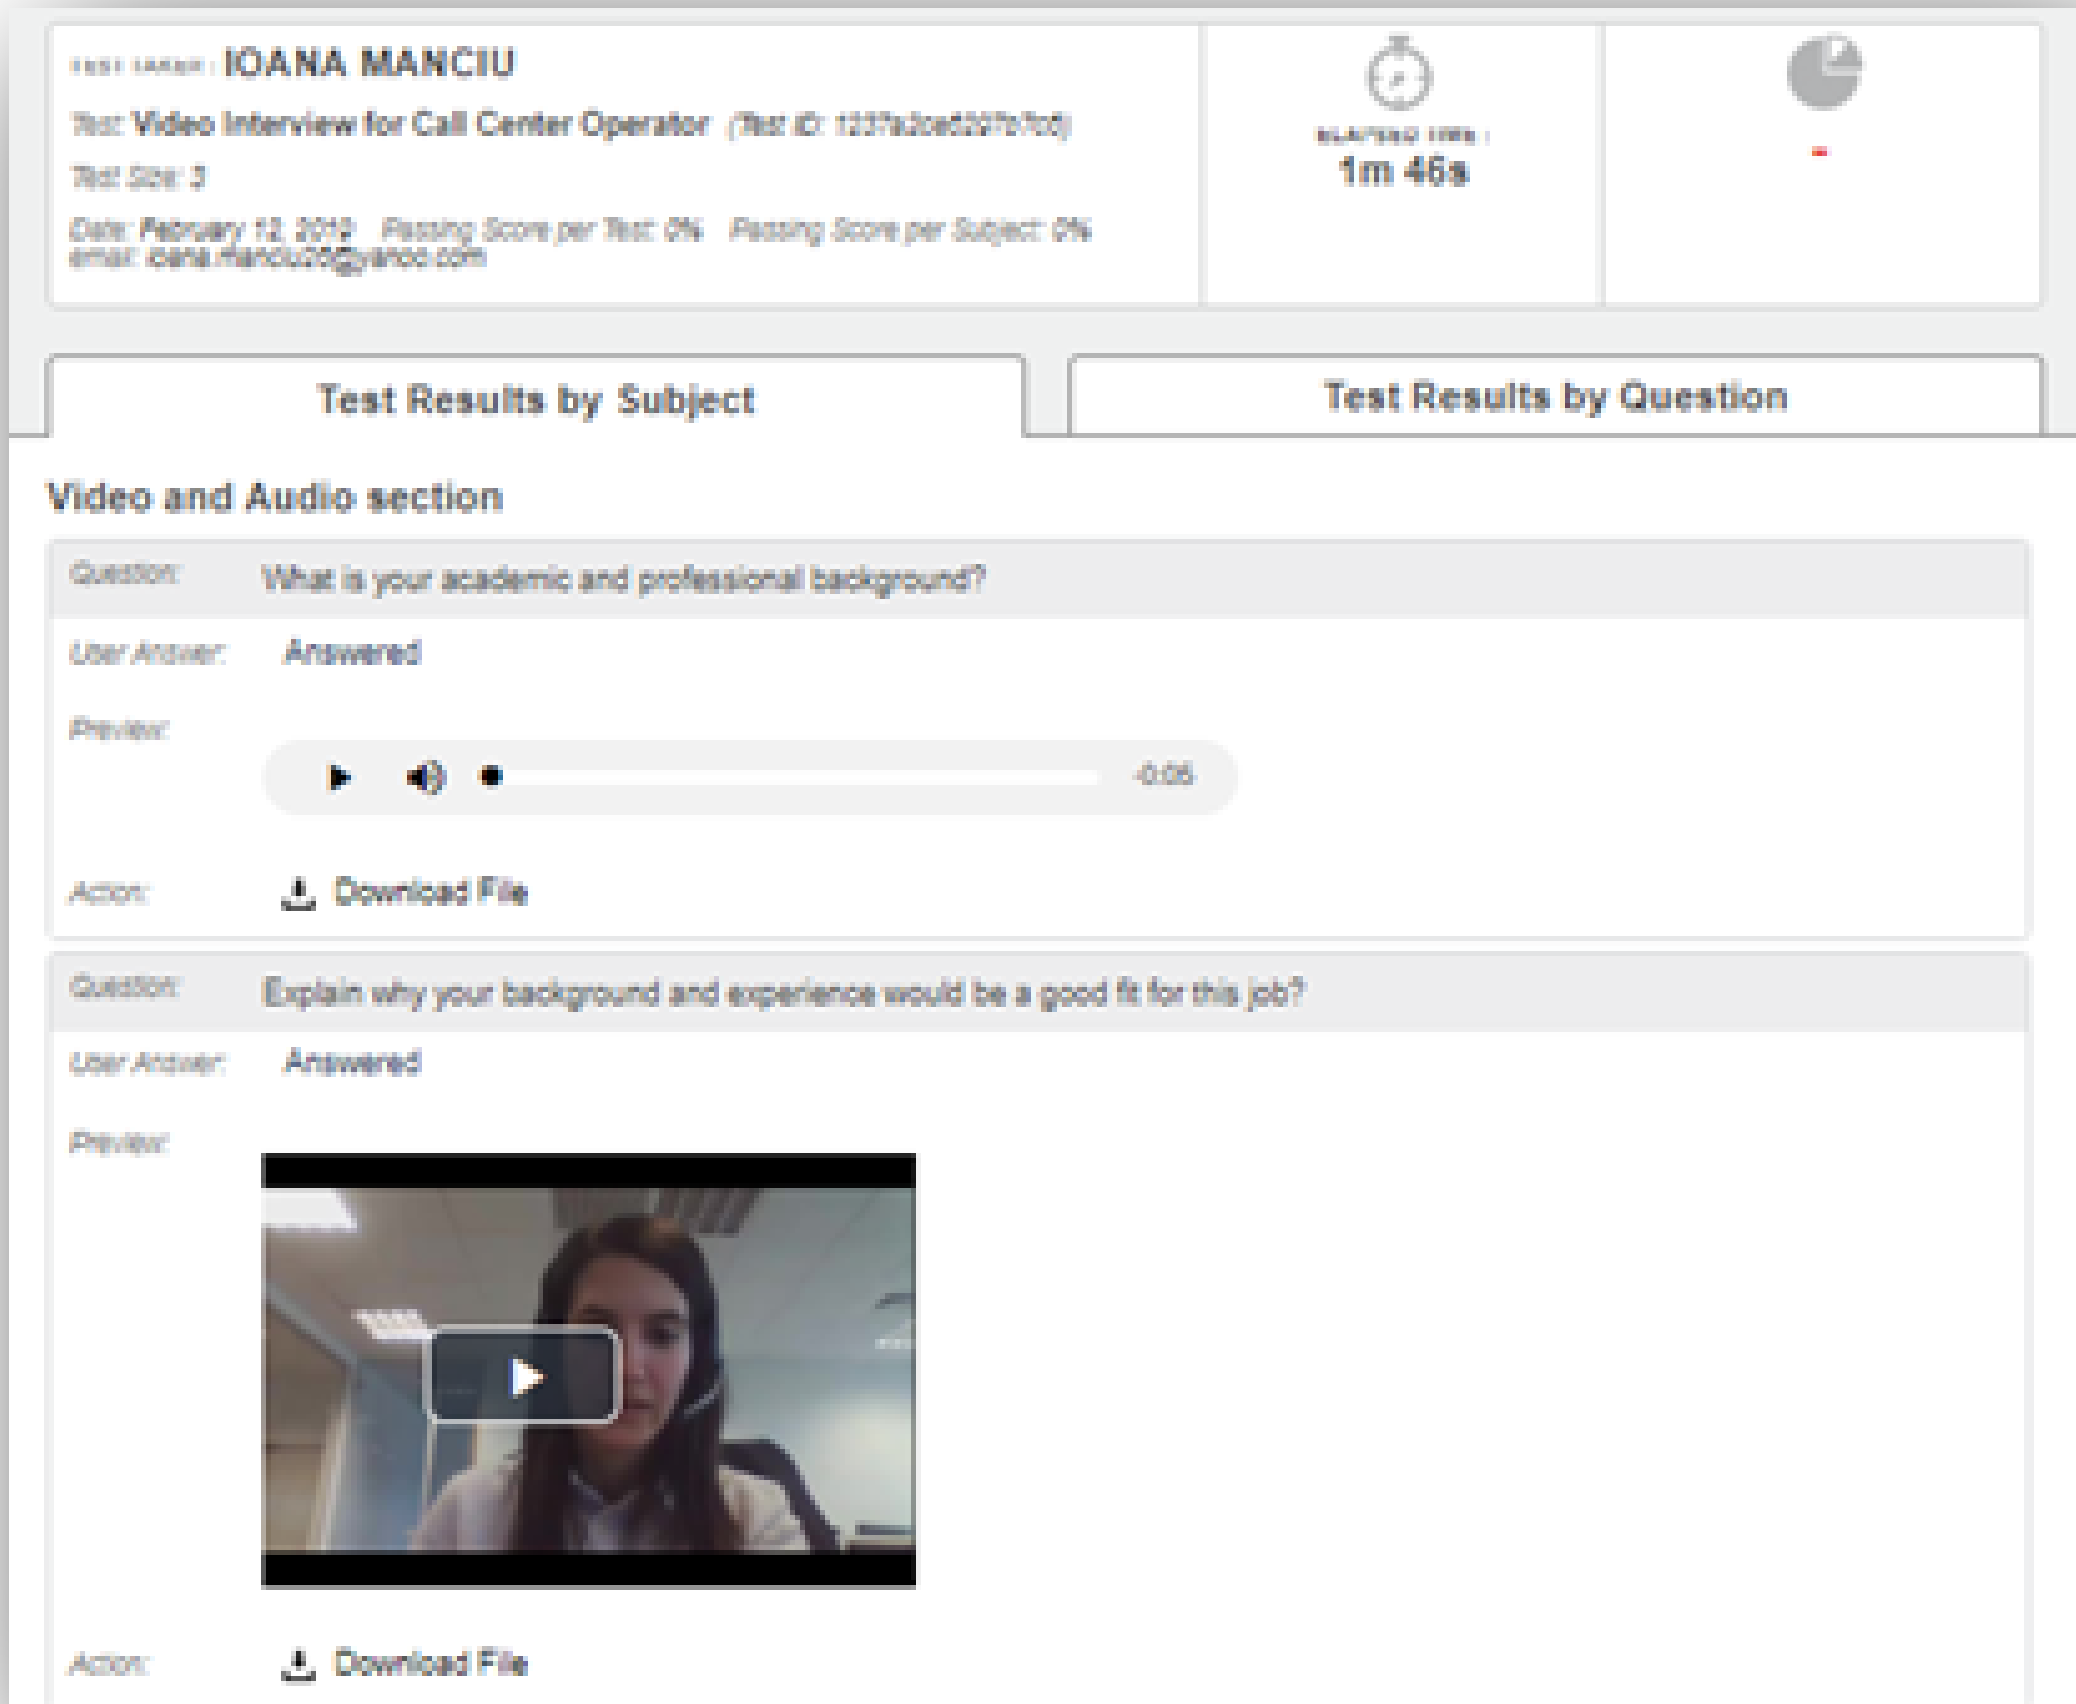

3. The employer can ask an interview question and the candidate can record audio only.

4. The employer can ask the candidate to hold up their driver license and speak their name and address to verify their identity before starting the test.

5. The employer has access to the test results in a matter of minutes.

About PeoplogicaSkills

PeologicaSkills is a web-based online skills testing tool that creates valid, job-based skills tests by combining multiple subjectes and skill levels into a single skills assessment. Tests can be customised to suit particular needs and computer generated reports provide accurate results.
